

Diabetes Foundation Programme

For Practice Nurses

A three day programme designed specifically for new Practice Nurses or those requiring a basic diabetes update.

Agenda

The programme will focus on:

- Diagnosing diabetes
- Treatment pathways for type 1 and type 2 diabetes
- Healthy eating
- Blood glucose monitoring
- Foot care
- Latest advances in diabetes care
- Opportunities to discuss cases, share experiences and network with other HCPs from the multidisciplinary team across the PCTs

Completion of a work based project between day 1 and 2

This three day programme is designed as a foundation for Practice Nurses who have not undergone any formal diabetes training or those who need a refresher in managing diabetes care. It is intended to equip you with all the skills required to have a good understanding of the principles of good diabetes management.

Following on from this foundation programme we would encourage the nurses to complete the MERIT programme which then leads into the Diabetes Diploma module which will commence Spring 2012.

This course is being delivered by Su Down

Diabetes Nurse Consultant, Somerset Community Health.
